

I PHONE EMAIL SET UP

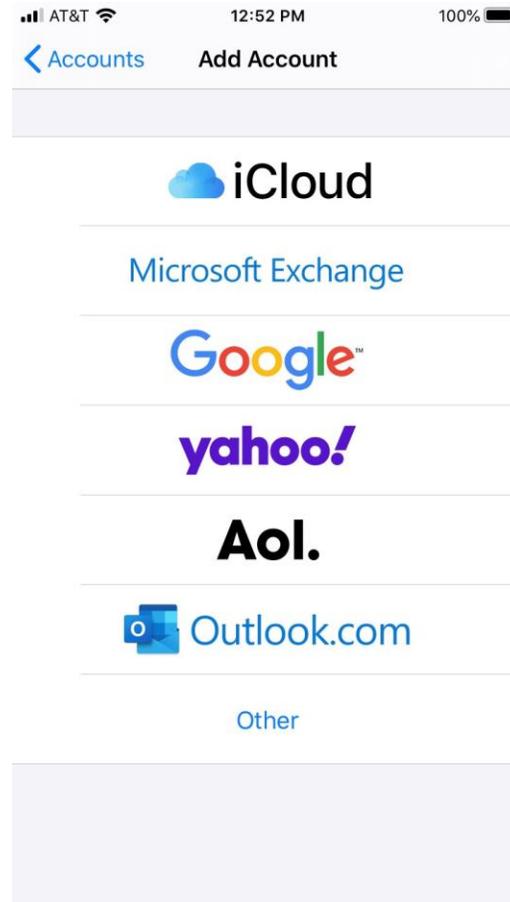

1. Click the settings icon and scroll down to Passwords & Accounts

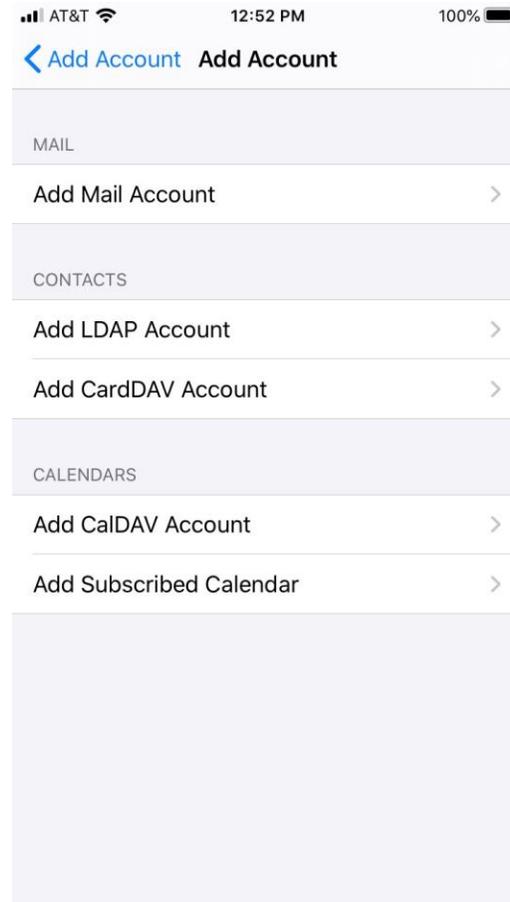

Click on ADD ACCOUNT

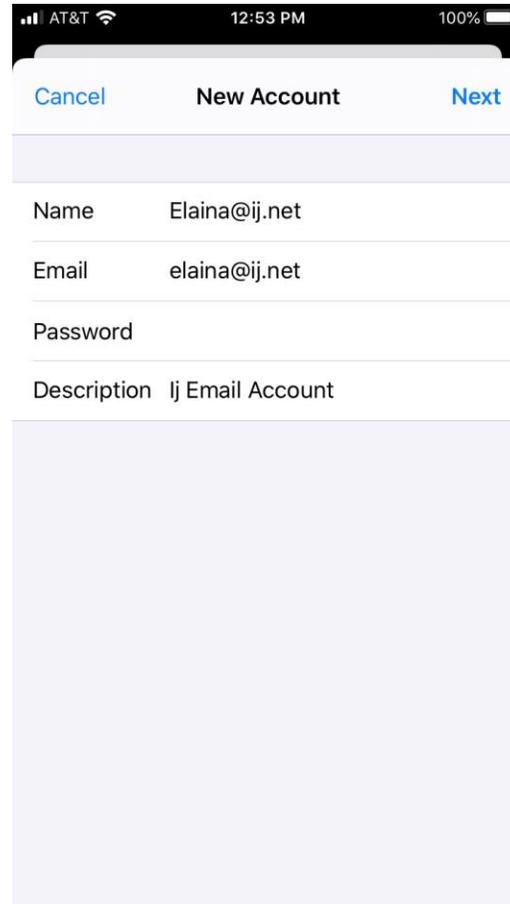

SELECT "OTHER"

CLICK ON ADD MAIL ACCOUNT

In the Name box, enter your Email address. (for example, tony@contoso.com).
In the Address box, enter your full e-mail address again.
In the Password box, enter your password.
Press NEXT when finished

The image shows a screenshot of an iPhone's 'New Account' setup screen. At the top, the status bar displays 'AT&T', signal strength, Wi-Fi, the time '12:53 PM', and '100%' battery. Below the status bar is a navigation bar with three buttons: 'Cancel' (blue), 'New Account' (black), and 'Next' (blue). The main content area contains four input fields, each with a label on the left and a text entry on the right: 'Name' with 'Elaina@jj.net', 'Email' with 'elaina@jj.net', 'Password' (empty), and 'Description' with 'Ij Email Account'. A large, empty light gray rectangular area is positioned below the 'Description' field.

Tap either IMAP or POP and enter the incoming and outgoing mail server settings as pictured.

Name: Enter email address

Email: Enter email address

Description: Give the mailbox a name such personal email or work email. We chose in our example to use then domain.

Incoming mail server:

Host Name: mail.yourdomainname.com (Ex. Mail.pbx-change.com)

Username: Full email address (Ex. janedoe@ij.net)

Password: Enter password

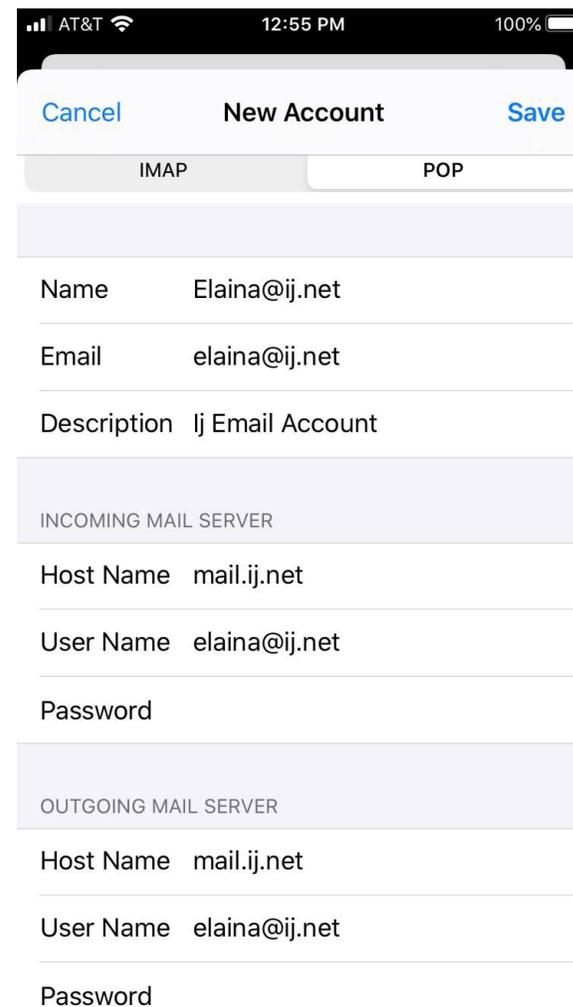

Outgoing mail server:

Host Name: mail.yourdomainname.com Ex. Mail.pbx-change.com

Username: Full email address (Ex. janedoe.IJ.net)

Password: Enter Password

Press SAVE when complete.

The screenshot shows an iPhone interface for setting up a new email account. At the top, the status bar displays 'AT&T', signal strength, Wi-Fi, the time '12:55 PM', and '100%' battery. The main header is 'New Account' with 'Cancel' on the left and 'Save' on the right. Below the header, there are two tabs: 'IMAP' and 'POP', with 'POP' selected. The form contains the following fields:

- Name:** Elaina@ij.net
- Email:** elaina@ij.net
- Description:** Ij Email Account

Below these fields, there are two sections for mail servers:

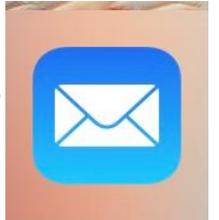

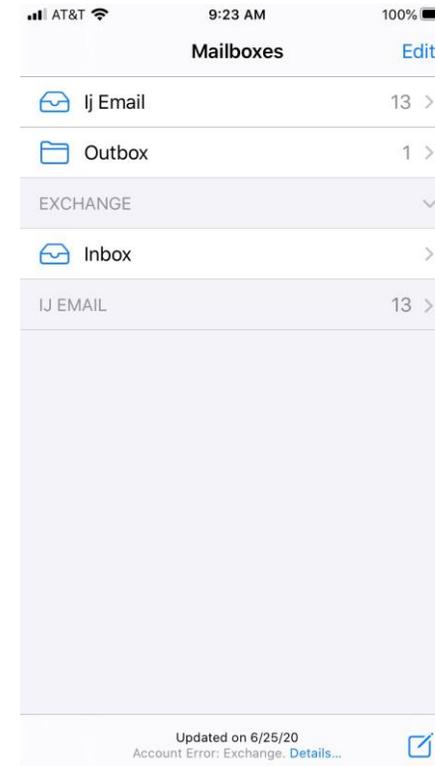

- INCOMING MAIL SERVER:**
 - Host Name:** mail.ij.net
 - User Name:** elaina@ij.net
 - Password:** (empty)
- OUTGOING MAIL SERVER:**
 - Host Name:** mail.ij.net
 - User Name:** elaina@ij.net
 - Password:** (empty)

You are done setting up your email.

After pressing save the account will authenticate then return to the Passwords & Accounts screen

Return to the main screen and click on your mail icon.

What else do I need to know?

- The difference between IMAP and POP3:
 - IMAP: Mail syncs with your mail client. For example, deleting mail from your Outlook deletes the mail on the server. Local copy is not stored with your mail client.
 - POP3: Mail is copied and downloaded from the server - and individual copy resides on your client. Deleting mail in Outlook does not delete it from the server unless specifically told to do so in Outlook. This uses space on your computer, but allows mail to be available if you are offline.
- If your mail resides at your company domain name then your Incoming and Outgoing Servers should be set to : mail.yourdomainname Ex. Mail.pbx-change.com
