

Unified Communications

Hosted voice services, video conferencing and messaging

We connect your business offices, remote employees, and partners seamlessly. Work from anywhere with the same number and features you have while working from the office.

HOSTED VOICE

CLOUD CALLING FEATURES:

Auto Attendant, Hunt Groups, Forwarding, Voicemail to Email, Barge-In, Whisper and more!

CALL FLOW CUSTOMIZATION:

Efficiently direct calls to a phone number, extension or group using intelligent call routing.

CALL ANALYTICS:

Drive staff performance and maximize the customer experience with call reporting and recording.

ONE NUMBER, MANY DEVICES:

Work seamlessly from your desk phone, soft phone, or cell phone.

HIGHLY SECURE:

Secured with built-in encryption to protect the privacy of both users and data.

RELIABLE:

99.99% committed availability to stay connected.

VIDEO CONFERENCING

SCREEN SHARING:

Share your entire screen or just a specific document, without additional downloads or separate web collaboration apps.

RECORDINGS:

Record meetings for people who can't attend or for those who want to refer back to what was discussed. Recordings are conveniently stored in your individual or group space for future review.

IN-MEETING CHAT:

During meetings, desktop, and mobile participants can chat with one another to increase meeting effectiveness.
